

QUITE SIMPLY, WE LISTEN TO OUR CUSTOMERS AND DELIVER OUR PROMISES.

Here is what our clients have to say:

- “I have worked with Kaiser Consulting for a number of years on a variety of projects from SOX Compliance, Payroll, and Reconciliations through system implementations. I have always enjoyed their level of professionalism, attention to detail, and ability to understand their clients’ needs. Honda presents many challenges in work and degree in scope and deliverables. The Kaiser team dedicates itself to providing a professional work product that is complete and accurate, while efficiently utilizing staff resources. I would highly recommend Kaiser Consulting and their team of professionals.”
- “The Kaiser team has been a great partner for Worthington Industries for the past decade. We receive a high level of service on a consistent basis with the desired amount of flexibility in scheduling. We’ve also received the benefit of consistency of resources as individuals assigned are typically on our account for multiple years.”
- “I have worked with Kaiser Consulting for almost ten years. They have always been a consistent and reliable source of supplemental talent for our company. We have experienced exceptional continuity of resources over the years. The Kaiser consultants know our company, know our people, and understand our processes. This results in the efficient and effective execution of our work. Kaiser Consulting has consistently demonstrated over the years that they put the needs of their clients first. Sometimes that has meant that they have declined to provide support where they didn’t think they could bring the “right” resources. In today’s environment, I find that refreshing.”

- “We have used Kaiser Consulting for the past several years for services such as financial, operational and IT audit staffing as well as special project assistance. They have been an excellent business partner exceeding our expectations and delivering exceptional cost savings versus larger audit firms. We could not be more pleased with the talented resources that are provided and the flexibility with the capabilities that fit our business needs.”
- “Kaiser Consulting has been awesome for us to work with at IGS Energy. I continue to be impressed with the quality of the professionals they have been able to offer. From day one of working with Kaiser Consulting, they have always taken the time to understand our needs and desires, what it is we are trying to accomplish and then match us with the right personnel to work with us. And they have been super flexible and gone out of their way to accommodate changes in our needs and timing because we all know those things happen! We are now in our fourth year of working with Kaiser and have recommended their team to numerous others. Our experience has been great!”
- “We have had great consistency in the people assigned by Kaiser to work on our engagement which has led to significant year-over-year efficiencies. The Kaiser consultants are thought of as an integral part of our team and have become great peers and friends. The staffing model that Kaiser offers fits perfectly with the cyclical nature of our SOX work and the unpredictability of the timing upon which we receive requested documentation.”
- “With over 20 years in the nonprofit sector, I had worked with a variety of accounting firms, bookkeepers, board treasurers, and audit firms. When my organization contracted services with Kaiser Consulting, I was shocked to discover how much I had to learn! The Kaiser staff members have been patient, clear, available, and firm about best practices. Our financial reports are in top form, we make much better operations/administrative decisions, and things are carefully timed...no “just under the wire” filings, and no surprises. Kaiser Consulting is outstanding in the field and invaluable to my organization.”
