

Brandy Hackett

Consultant

ABOUT BRANDY

An accomplished accountant with over 15 years of experience, Brandy has an impressive grasp on all processes leading up to and including the preparation of monthly, quarterly, and yearly financial statements. She has demonstrated her in-depth knowledge of accruals, reconciliations, and data validation at several companies, including large, multi-entity organizations. In her various accounting roles, she has been involved in margin analysis, budgeting, forecasting, and cash flow projection, as well as in the development of incentive and compensation plans. Brandy is also experienced in the testing of internal controls and SOX compliance.

Brandy's roles have primarily been with manufacturing companies spanning several different industries. She has extensive experience in Oracle, SAP R/3, SAP S/4 HANA, and as a BW/BI Super User. She has worked in environments where information must be compiled from multiple software sources to be presented in financial statements. She has experience in the conversion of legacy systems to more technically advanced systems and has been an integral part of the centralization of accounting functions from multiple areas. Brandy is also skilled in cash management within a multi-unit organization across international currencies.

Clients value Brandy's eye for detail and her ability to adjust quickly to rapidly changing situations.
