

Tina Myers, MSM

Consultant

ABOUT TINA

Holding a master's degree in management and Kaizen Leader certification, Tina is a dynamic accounting and financial professional with over two decades of Fortune 50, Fortune 1000, and private industry experience. She is also a valued finance and digital skills adjunct professor. Her proven history of helping clients succeed comes from her strengths in strategic planning, operational and team leadership, risk and change management, business process improvements, system implementations, and insightful analytics.

Tina previously held management roles in accounts receivable and accounts payable at a Fortune 50 multinational healthcare services company. She capably directed the processing of a \$130+ billion accounts receivable portfolio comprised of multiple business units and 40+ million transactions annually. Her end-to-end accounts receivable capabilities include assessing customer creditworthiness, performing timely monitoring to ensure collections, managing the monthly close process, establishing reserves, coordinating with others on escalating issues, leading resolutions, and overseeing customer quality audits and SOX audits.

As an accounting program manager at a third-party logistics provider, Tina implemented billing procedures and utilized software systems to optimize processing and reporting. At a leading Fortune 1000 global manufacturing company, she served as a credit and collections manager of a \$100+ million accounts receivable portfolio for several business units and a diverse customer base.

Tina is a subject matter expert in creating, maintaining, and improving business strategies, processes, procedures, and internal and SOX controls by designing new or implementing out-of-the-box solutions with reliable results. She is adept at leading in-person, remote, and outsourced teams of financial professionals within the U.S. and abroad, performing risk assessments and implementing actions to protect an organization's interests, and managing performance targets utilizing metrics such as KPIs and service-level agreements. Her robust software skill set includes SAP, Tableau, Power BI, Alteryx, JD Edwards and Crystal Reports.

Clients value Tina's problem-solving abilities and focus on continuous improvement as she works independently, as a team member, or as a project lead to help them meet their enterprise goals. She is comfortable communicating with personnel at all levels and making recommendations to increase operational effectiveness and efficiencies, whether providing accounting, finance, auditing, or ad-hoc support.
